

Hot Rebates, Cool Savings- Consumer Rebate Program

Description

The LADWP Consumer Rebate Program (CRP) provides rebates to residential customers to promote the installation and use of energy-efficient equipment, ranging from variable speed pool pump and motors to home Heating Ventilation and Air Conditioning (HVAC) systems, such as a central air conditioner. This program is designed to both educate and encourage LADWP residential customers to purchase and install qualifying equipment at their home.

Benefits

As a publicly-owned utility, LADWP offers programs to assist our customers in using energy and water more efficiently, which helps reduce your bills, save resources, protect the environment, and improve the comfort of your home.

Qualifications

You must be an LADWP residential customer with active electric meter service. Check the CRP application for qualifying items before you apply. These items are also listed at www.ladwp.com/crp

Rebate Amounts

- Variable Speed Pool Pump and Motor: \$500 per unit
- Energy Efficient Windows: \$2.00 per square foot
- HVAC, Central Air Conditioner or Heat Pump: \$100 -\$120 per ton
- Cool Roofs: up to \$0.60 per square foot
- Whole House Fan: \$200 per unit

How to Apply

Complete the rebate application after both purchasing and installing your high efficiency product. All applications must be postmarked within 12 months of the purchase date. For your convenience, you have two options for submitting your application: online or by mail.
